

Thank You Project: Card

1. Place the card with the fold on the left. Cover the card front with green/blue color block paper, placing the green block against the fold and including a small portion of the light blue block in the bottom right of the card front. Chalk the edges of the card front yellow and add penwork around the edges of each color block.
2. Trace 3 left sides of the template's Butterfly Heart on yellow/green striped paper. Flip over the template to trace 3 right sides of the Butterfly Heart onto green textured paper. Cut out all 6 shapes and use the instructions printed on the template to weave 3 hearts. Accent the edges with penwork and chalk the butterfly yellow. Glue two hearts down the card front.
3. Computer journal "thank you" on yellow paper and chalk the edges. Attach the phrase to the light blue color block with two green mini brads.
4. Inside: Cover the bottom 2 1/2" of the card inside with green and dark blue color blocks from the color block paper. Add penwork around the edges of each color block, then glue the third heart to the right side.

Supplies:

- Scandinavian Hearts Template
- papers
- black pen
- pencil
- chalk
- foam tape
