

# Celebrate!

Designer: Susan Cobb

**Susan's Tip:** This was my first time using the [Fold-It Ribbon Swirls](#) template, and I must admit it is really fun and easy, and takes less time than it looks like it would! I used the Loop-de-Loop large shape on the template to assemble a flower, then layered it over the base and added tails. Gluing two contrasting patterned papers back to back gives a colorful look, and makes a very sturdy flower when it's all assembled.

## Supplies:

- [Fold-It Ribbon Swirls template](#)
- Citrus Use 'Em for Anything papers
- Citrus Creative Kit
- white cardstock
- [one 5" x 6 1/2"](#) blank white card
- [X-acto® knife](#) (for scoring corner and adding brads)

## To Make the Folded Flower:

Use the template to cut an orange base and two tails, then mat each one on white cardstock. Glue pink swirls paper and blue textured paper back to back, then trace and cut out five large Loop-de-Loop shapes. Make two holes in each piece, then bring the rounded ends of one piece together and insert a mini flower Brad Buddy™ and a mini brad. Add remaining "looped" pieces to the brad, beneath the first. Attach the flower to the orange base and tails.
